Questions & Comments

Today's Software Development Requirements

Software Framework: A Library ?

National e-Government Project

Software Framework: A Library ?

- ❖ Universal
- ❖ Reusable
- ❖ Software Platform
- ❖ Includes:

- Support programs
- Compilers
- Code Libraries
- Tool Sets
- API's

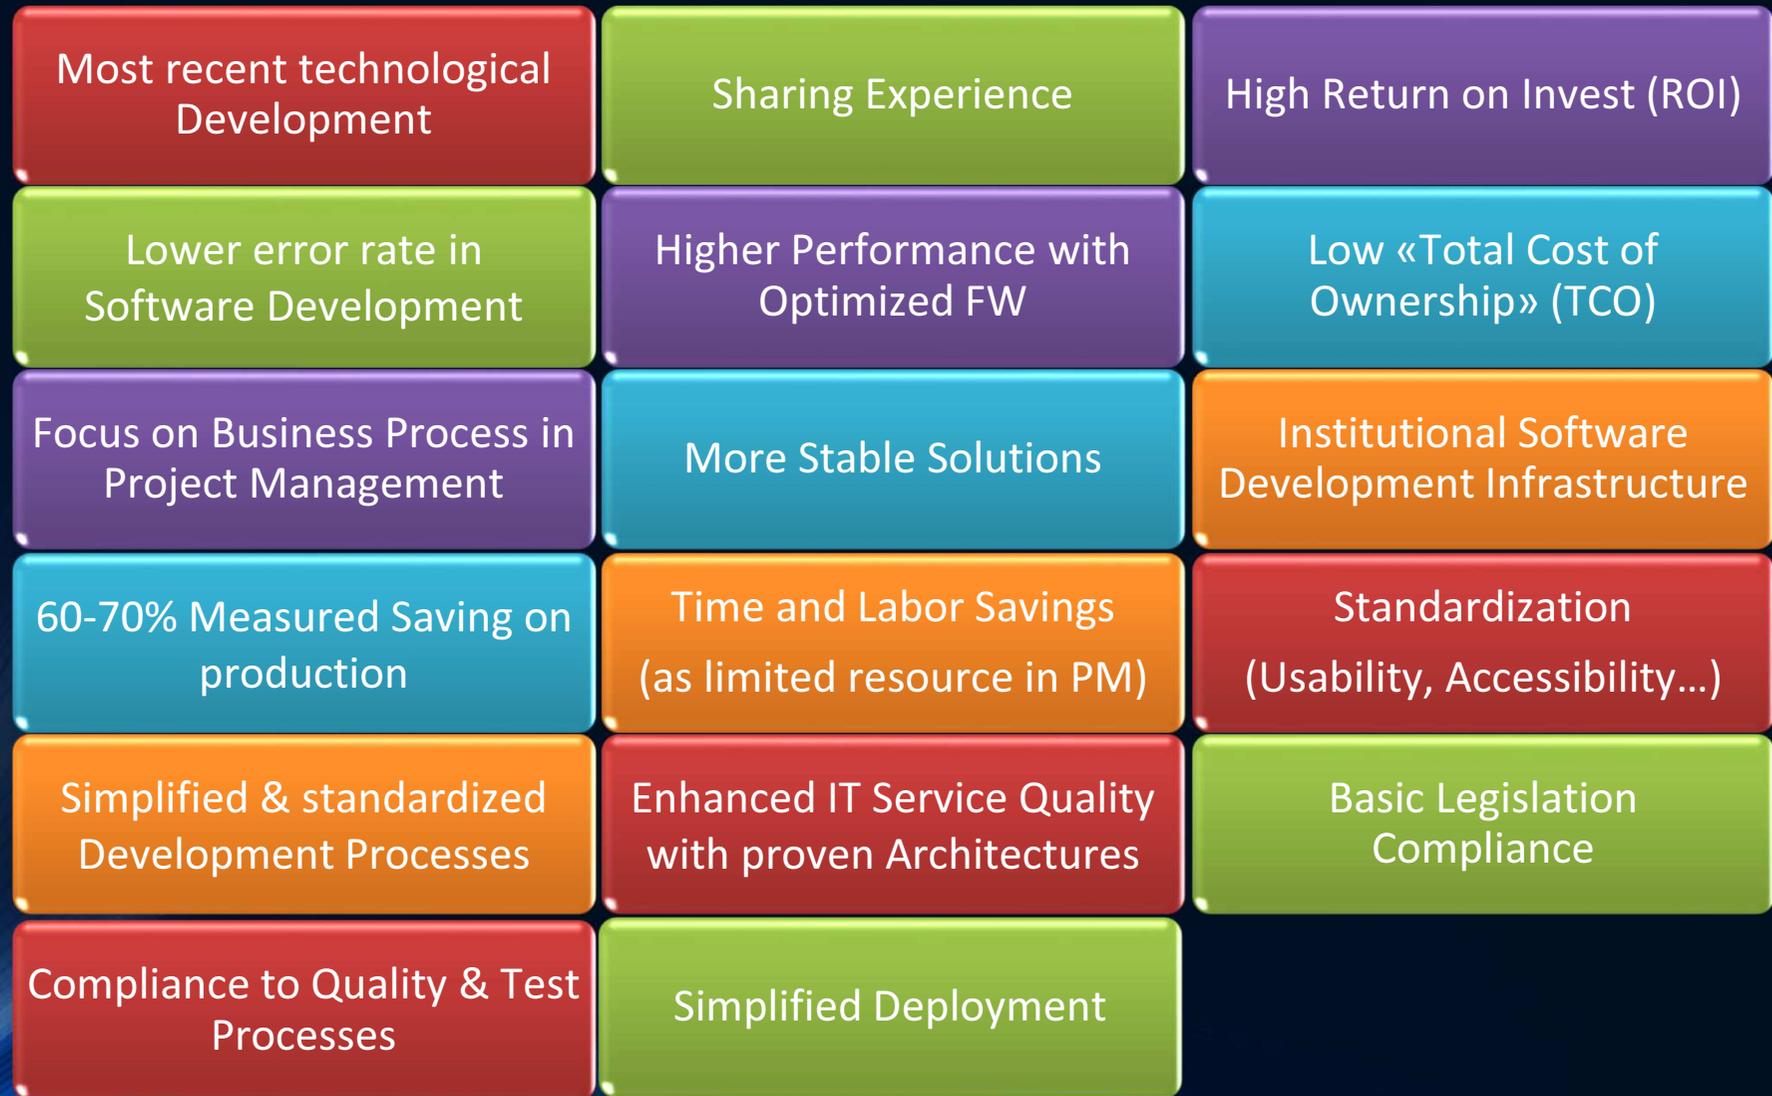

that bring together all the different components to enable development of a project or solution.

DIFFERENCES

- ❖ **Flow control** is dictated by Framework
- ❖ A framework has a **default behaviour**
- ❖ A framework can be **extended** by the user usually by selective overriding or specialized by user
- ❖ The framework code, in general, is **not** supposed to be **modified**

National e-Government Project

Framework Savings

International Trends & Practices

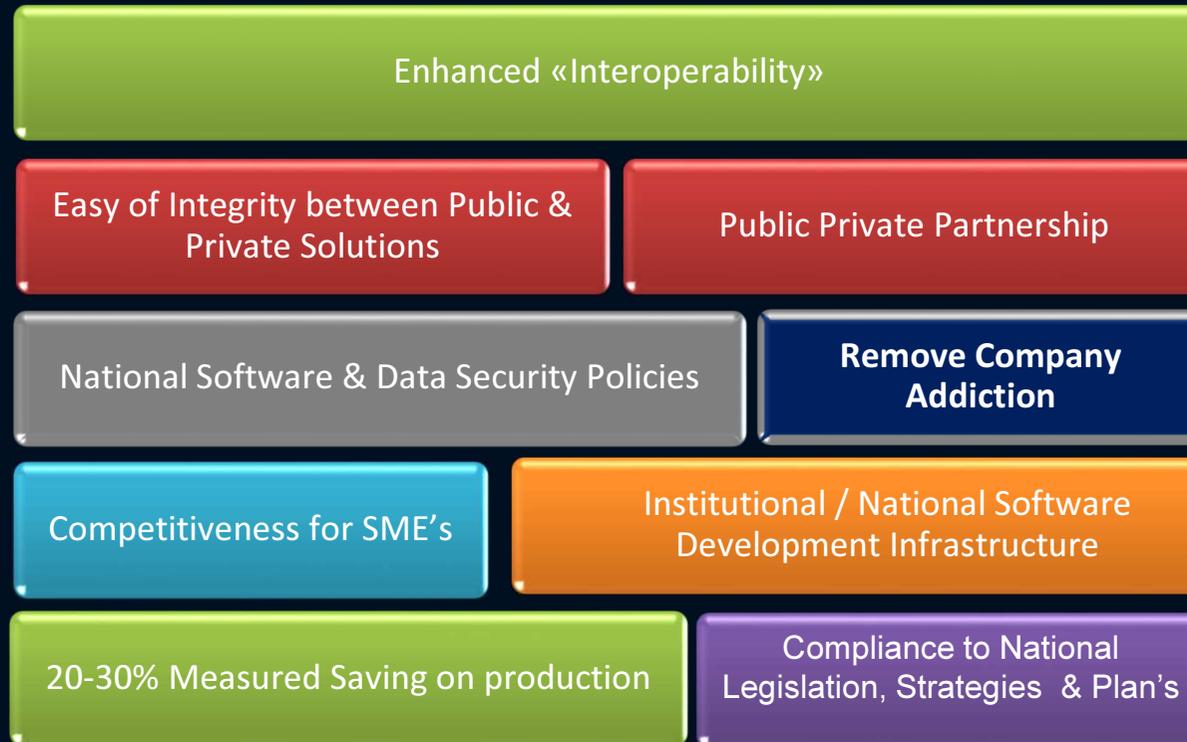

Evaluations & Suggestions

Questions & Comments

National Framework Savings

- | | | |
|---|---|---|
| Most recent technological Development | Proven Experience | High Return on Invest (ROI) |
| Lower error rate in Software Development | Higher Performance | Low «Total Cost of Ownership» (TCO) |
| Focus on Business Process | More Stable Solutions | Institutional Software Development Infrastructure |
| 60-70% Measured Saving on production | Time and Labor Savings | Standardization (Usability, Accessibility,...) |
| Simplified & standardized Development Processes | Enhanced IT Service Quality with proven Architectures | Basic Legislation Compliance |
| Compliance to Quality & Test Processes | Simplified Deployment | |

Questions & Comments

European Union

- ❖ **July 1999:** Interoperability Decision of the European Council and the European Parliament
- ❖ 1720/1999/EC: Decision of the European Parliament and of the Council of 12 July 1999 to adopt a series of actions and measures in order to ensure interoperability of, and access to, trans-European networks for the electronic Interchange of Data between Administrations (IDA)
- ❖ **7-8 July 2003:** European eGovernment conference in Como , Italy
(http://europa.eu.int/information_society/eeurope/egovconf/index_en.htm)
- ❖ **eEurope 2005 Action Plan:** Deliver the interoperability framework for pan-European services by the end of 2003
- ❖ **INSPIRE:** Directive 2007/2/EC of the European Parliament and of the Council of 14 March 2007 establishing an Infrastructure for Spatial Information in the European Community (INSPIRE). OJ L 108, 25.4.2007, p. 1

European Union

(ISA) Programme

Interoperability Solutions for European Public Administrations

<http://ec.europa.eu/isa/>

ISA² : **26 June 2014**: the European Commission has adopted a proposal for a Decision of the European Parliament and of the Council establishing a programme on interoperability solutions for European public administrations, businesses and citizens (ISA²)

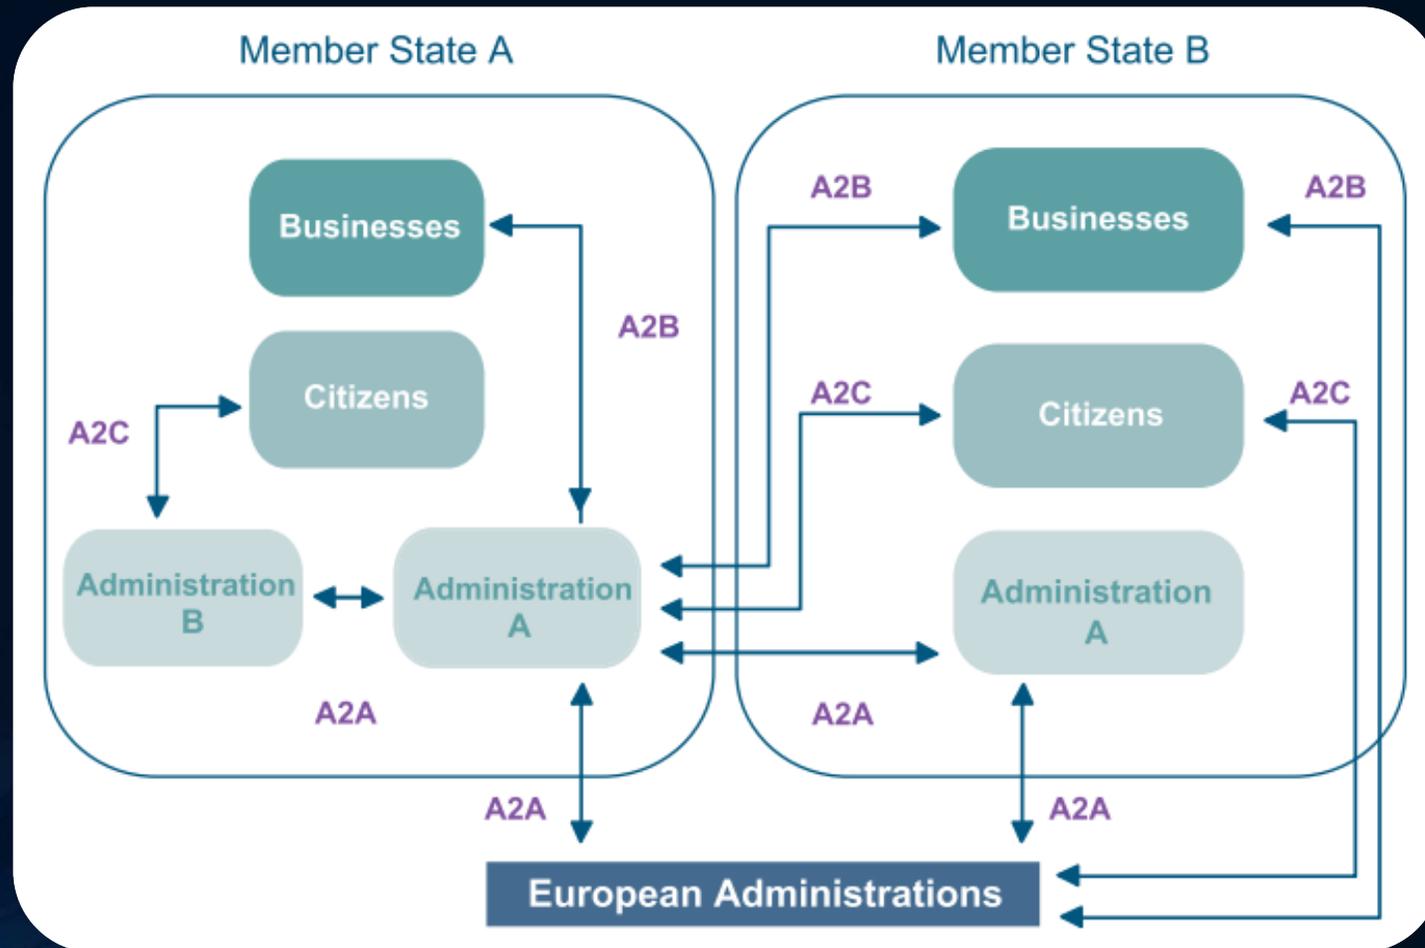

26.06.2014 - 2014/0185 (COD): Establishing a programme on interoperability solutions for European public administrations, businesses and citizens (ISA²) Interoperability as a means for modernising the public sector

ISA² is the key that will unlock that potential. It is **central** to the **Digital Agenda for Europe**.

Korea e-GIF & e-GovFrame

IBM Government Industry Framework

N.Korea eGovFrame *

National Information Society Agency

Reducing of Cost via Software Framework

Most of technical issues are handled by Software Framework

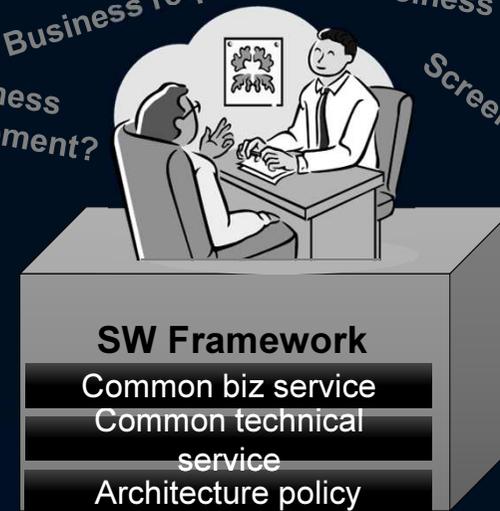

IS development without SW framework

Error handling?
 Transaction control?
 Thin Client?
 System log?
 Business requirement?
 Batch?
 Package composition?
 Operation
 Business functions?
 Interface with Tuxedo?
 Text transformation?
 Business cache?
 Business log

IS development with SW framework

Business requirement?
 Business functions?
 Screen layout?
 Business improvement?

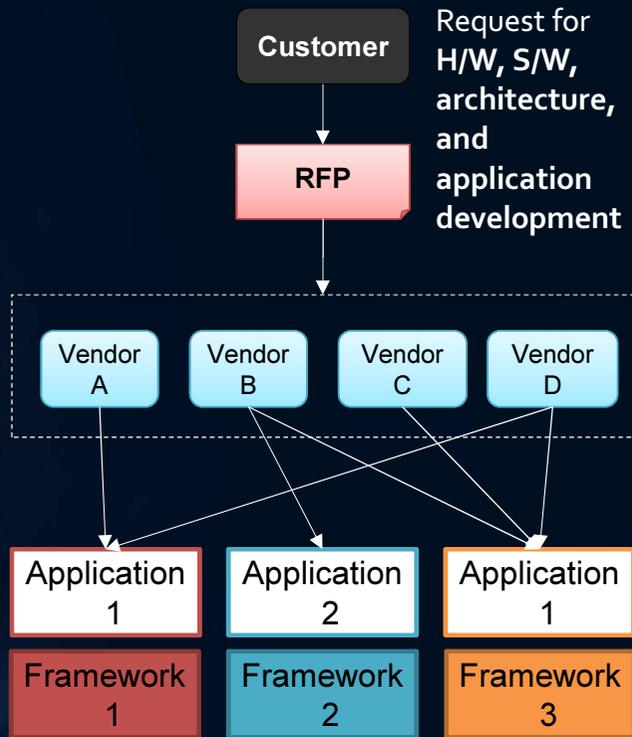

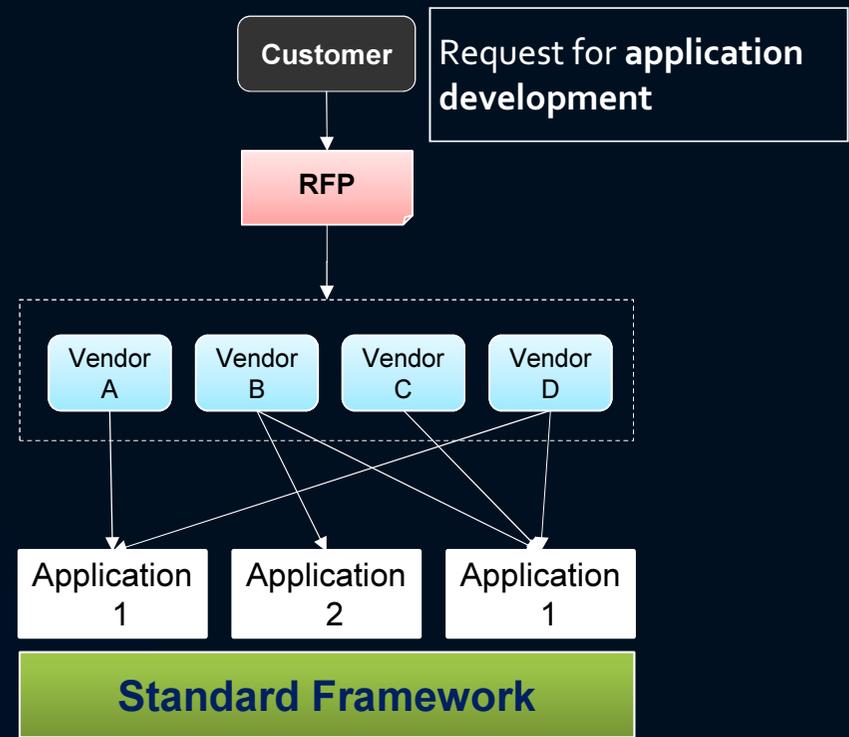

N.Korea eGovFrame *

Development with vendor's frameworks

Development with standard frameworks

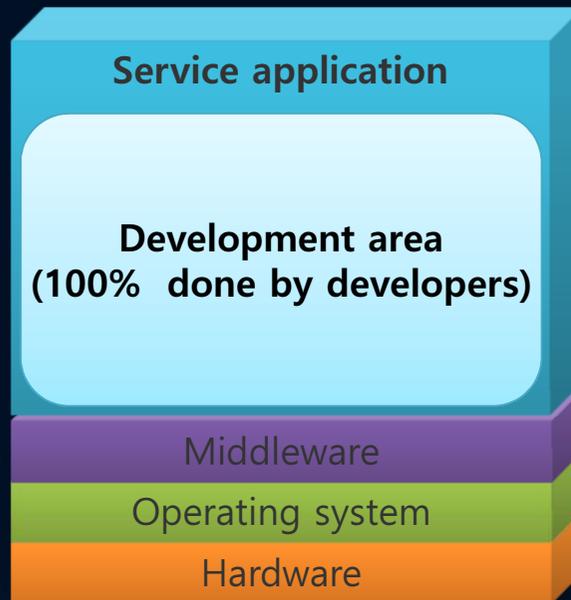

N.Korea eGovFrame*

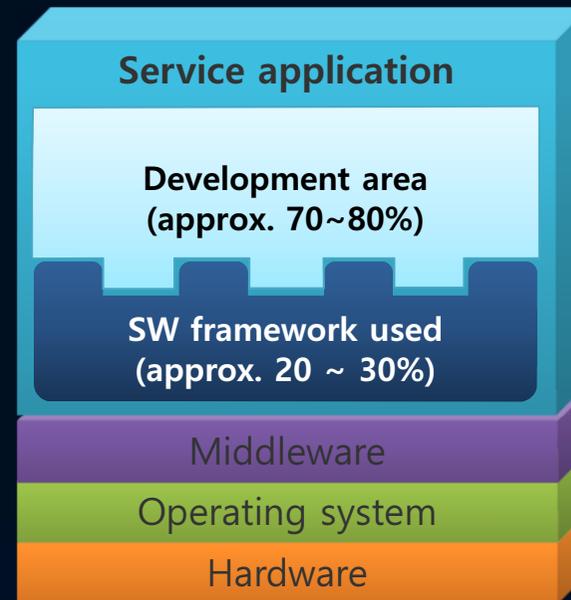

Reducing of Cost via Software Framework

(IS* without SW framework)

(IS with SW framework)

* IS : Information system

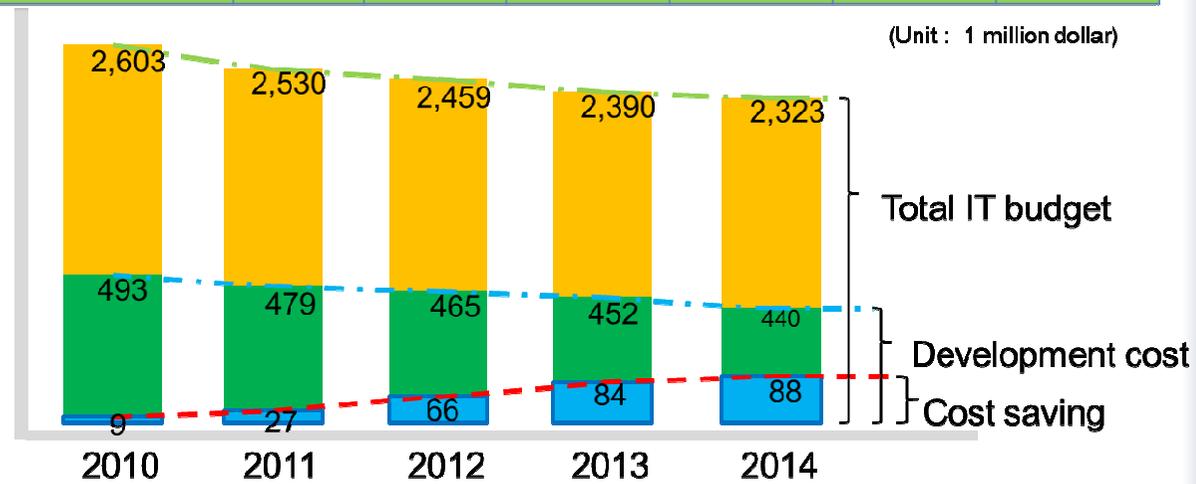

N.Korea eGovFrame *

About **274 million dollars of budget saving** are expected by applying eGovFrame until 2014

< Expectation of Cost saving using eGovFrame >

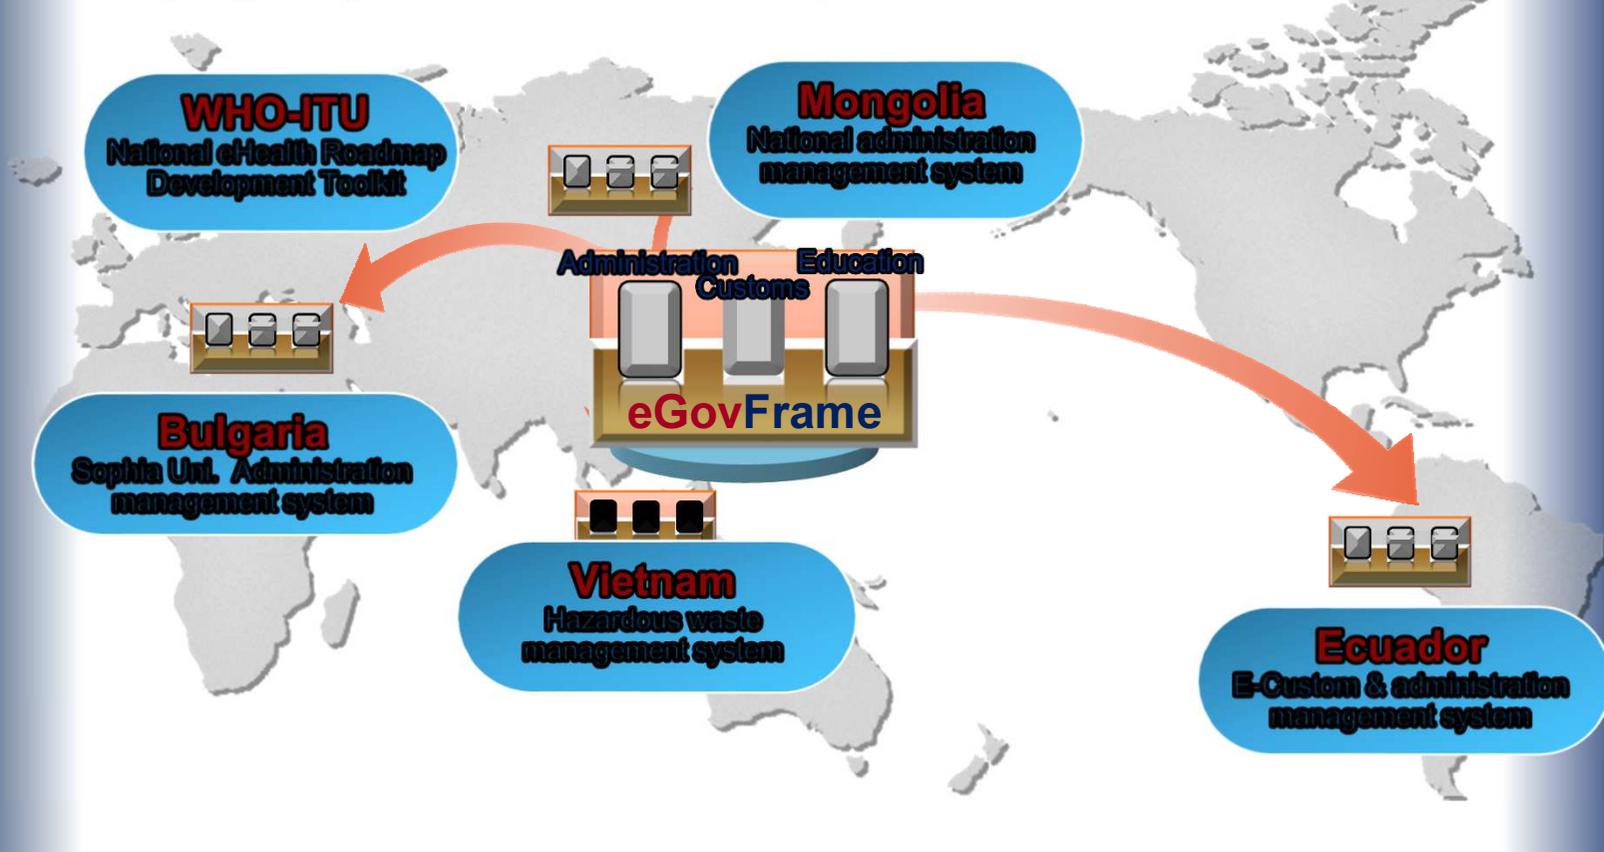

Section	2010	2011	2012	2013	2014	Total
Total IT Budget	2,603	2,530	2,459	2,390	2,323	12,304
Development Cost	493	479	465	452	440	2,329
Cost saving	9	27	66	84	88	274

N.Korea eGovFrame *

eGovFrame is applied to the e-Government in four countries for developing the public administration, custom and education services

N.Korea eGovFrame *

Before

Redundant development of similar functionalities in every projects

Vendor Dependency due to framework delivered as black box

Disadvantage to SMEs who cannot afford to possess the framework

Difficult to maintain the system due to lacking on development standard

Spent longer time and effort to link the systems due to different framework

Now

Reduction of redundant development by reusing 219 common components

Eliminating dependency to the provider by utilizing open sources framework

Enhancement of SMEs competitiveness through sharing standardised framework

Convenient to maintain the system with help of proven development standard

Enhances interoperability between systems by standardised framework

Evaluations & Suggestions

Questions & Comments

Evaluations & Suggestions

- ❖ **Multi-stakeholder approach** including Private Sector, Public Agencies and NGO
- ❖ Evaluating and supporting as **National Investment Project**
- ❖ With the **leadership of a Public Agency** that has an experience on national software development and especially software architecting, test, quality appliance of international standards compliance
- ❖ Applying **step by step**

e-Government Software Framework and Impacts on Public Sector
